

GUARDEX LUBES INC. PRESENTS

CISOL BD-501

GENERAL INFORMATION

Guardex Cisol BD-501 is an organic solvent (citrus oil) with added surfactants, formulated to mix with water. Contains no phosphates. It is non-corrosive, non-caustic and non-acidic. Test's on Buna, Viton, Neoprene and tire type rubbers have not proven harmful.

Cisol BD-501 concentrate should be flushed off equipment with water within 30 minutes, if not on bare metal.

ADVANTAGES

Easy cleaning of tar, asphalt, heavy oil and grease from all types of equipment.

RECOMMENDED USES

Cisol BD-501 is specifically formulated to remove tar, asphalt, heavy oil and greases of all types from equipment. It may be used as a detergent in high pressure washers and steam cleaners, however, it's effectiveness in these applications will depend on the application and the concentrations used. All components of Cisol BD-501 are biodegradable. The major portion of Cisol BD-501 can be separated from the wash water by settling.
