

GUARDEX LUBES INC. PRESENTS

PENLUBE “E”

GENERAL INFORMATION

Guardex Penlube “E” was originally designed to aid the operators in the oilpatch. Guardex was asked by various companies to help them with clean-up of wellhead bolts, baked on bitumen, combined with sand, silt, and general rust and corrosion, thus Penlube “E” was originated. It is designed to penetrate the bitumen, dirt, and rust to lay down a film of oil to aid in the removal of wellhead bolts.

RECOMMENDED USES

Guardex Penlube “E” is used for loosening all nuts, bolts, pins, studs, valves, pipe couplings, machine parts, etc. Penlube “E” is excellent for salt water corrosion, sulphur
